You are welcome Robyn

We have a standing panel of nano experts who are being consulted on this specific matter by telecon next Wednesday. We also have internal experts who can assist. Exactly who fronts the media is yet to be confirmed – I would suggest Trevor in the first instance.

Susan Ley is no longer a Minister – I searched the brief and found the name in the header – but our system doesn't allow us to see it on screen. I have alerted parliamentary staff to this – thanks – good catch.

Cheers
Glen

Thanks Glen. Appreciate the heads up. Good brief. Have subject experts been identified who can assist with media?

Is Susan Ley still an assistant Minister?

Hi Robyn

Please find attached a near-final version of a briefing note going to Minister Gillespie this morning.

I trust the content is self-explanatory. We have coordinated a joined-up approach by engaging with experts, the infant formula industry, the Dept of Health and jurisdictions.

We are not certain when the ABC story will be broadcast – the latest indication was that this may be a week or two away. We have prepared a plan B should the story break sooner.

Our current webpage is based upon May 2016 results (involving US-only product) and will be archived and replaced with more Austro-centric content.

Let me know if you have any questions or would like anything further.

Cheers

Glen
