Subject: Irradiation of fruit and vegetables A1193

Categories: [REDACTED]

To whom it may concern

Please consider my concern on the lack of knowledge about the effects of photosanitary radiation on fruits and vegetables as proposed in project number A1193.

A lot is still unknown about many micronutrients, but also about the bioavailability of macronutrients and the effects of long term consumption of irradiated fruits and vegetables.

Please reconsider the fast tracking of project number A1193.

If it goes ahead, at least inform the public on a grand scale, so everybody knows what they are buying.

I also ask for labelling of the products that have been irradiated if the proposal goes ahead.

Kind regards,
