Subject: 'Submission on A1193 Irradiation of all fresh fruit and vegetables'.

This saddens me immensely.

Bad enough is the battle through the day to day life that we struggle with, that is the product of the corporate decisions, made by our fellow man, motivated by profit that as an outcome, a formidable life threatening entity has been created for us.

The result is an artificial environment!

What you are proposing is right up there with playing GOD with Mother Nature!

So what if the food rots? It is meant to!

Our immune systems are compromised with GMO's and radiation exposure, from the electronics we are grafted to and the nutrition poor food choices that have been made for us, by the persons who are meant to be caring for us as a society.

Always about the dollar!

What is a healthy life worth?

Whilst the population has expanded, who are we to create the demise of the faceless expendable and superfalist persons.

There is an old American Indian philosophy that is a simple message for the corporate world!

'Only when the last tree has been cut down

Only when the last fish has been caught.

Only after the last river has dried up,

Will man realise,

He can't eat MONEY!'

This is not evolution, stop fooling yourself about advancement.

We are regressing and playing a hand at the extinction of Man.

I myself, will do all that I can humanly do to assist my fellow man to be all that they can be,

This is called HUMANITY.

Something also missing in the world of Corporation.

You as a Government body, are employed to take care of your fellow man. This includes the making of the correct decisions for future generations to come.

For Everyone's sake..... Leave something natural that is the normal for the rest of those who will follow long after you have passed.

Apples don't taste like apples used to.

I grew up on a farm ,with an orchard and I can still recall the taste of the fruit from those trees.

I implore you to rethink the choices you THINK you have to make.

A step in the right direction, starts with the right decision for all it concerns.

My comprehension of this process, according to your website, occurs with radiation gamma rays and X Ray.

Do we need to don a Lead lined apron when we are walking around the supermarket? Is that where this will lead to?

5G, Covid 19, Irradiated Foods, GMO, Where does it end?

No wonder the mental health situation has escalated, suicides have increased and the Health Systems are unable to cope!

Where is the conscious awareness of the things that we do?

Mother of 5 healthy self sufficient children,
