Submission on A1193 irradiation of all fresh fruit and vegetables

Categories:

[REDACTED]

Letter to FSANZ re the Qld Governments application A1193 to irradiate all fresh fruit and vegetables.

I cannot believe that this application is being considered, what are the government officials trying to do ?by killing the goodness of

fresh produce before its sold on to the unsuspecting public consumer, do we not , as a nation of many health conscious

Individuals, have the right to be assured that the fresh produce being sold is sold without first being interfered with.

By eating fresh, we believe that we are eating healthily and taking care of our bodies.

By irradiating fresh produce you are depleting the produce of all the naturally occurring vitamins and minerals in them,

after irradiation we are left with a dead food!

Is that what you want to do??

What is the benefit of irradiating fresh food ? can somebody justify this insane move on behalf of our Government
This appears to be an ill -Informed decision !

Yours sincerely,
