Food Standards,
Australia- New Zealand.

Dear Sir/Madam,
Regarding Review of the Food Standards to allow dogs in outdoor dining areas.

As the law is now there is no problem with dogs because only one or two sneak in, but if they are allowed by law a dozen will be at every cafe. Some dogs are well looked after and clean but many are not. Many cafe's have very little room between tables. When a waiter or patron trips over a dog or his lead - who pays for the damage? Cafe owners will need High Insurance.

If dogs are allowed does this include Pitballs and Great Danes? Just imagine a dog fight .
We see little point of having Food Standards and having dogs licking everything in site.

Yours faithfully
V. Smallacombe
