**Submission on Proposal 1019:
Carbon Monoxide as a Processing Aid for Fish**

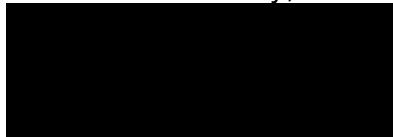

Coral Sea Fishing is a seafood trading company.

We are in full support of FSANZ's proposal to ensure that carbon monoxide is not permitted to be used as a processing aid for fish.

The code in its current form has not been clear to industry members, which in turn has caused confusion in the market.

Clarification of the food standards code to rule out the use of carbon monoxide when processing fish will assist industry members make better choices and help in removing non-compliant product from the Australian market.

Yours Sincerely,

Sean Cauchois
Managing Director
